🌐 Portfolio Iqama No: 2619451053 Iqama: Transferable Available to Join: Immediately

Professional Summary

- **Full Stack Software Engineer with 2+ years of experience building scalable web applications using Laravel, React.js, Node.js, and MySQL. Experienced in developing multi-tenant ERP systems, RESTful APIs, role-based access control, invoice/report generation, and modern dashboard interfaces. Currently based in Riyadh with transferable Iqama and available for immediate joining..**

Education

University of Okara, Pakistan

Mar 2020 – Feb 2024

Bachelor of Science in Computer Science (BSCS)

- CGPA: 3.27/4.0
- **Relevant Coursework:** Data Structures, Algorithms, Database Management Systems, Networking, Operating Systems, AI, Cryptography

Aspire College Burewala, Pakistan

Dec 2017 – Dec 2019

Intermediate in Computer Science (ICS)

- **Relevant Coursework:** Mathematics, Physics, Computer Science, Statistics, Financial Accounting, Programming Fundamentals, Data Structures, Database Systems

Experience

Full Stack Software Engineer

Riyadh, KSA

Samcotec [🔗](#)

Nov 2025 – Present

- Developed and optimized a multi-tenant ERP system using Laravel and React.js, implementing scalable architecture for multiple companies, branches, and tenant-based data isolation.
- Designed and enhanced backend modules including authentication, role-based access control, company/branch management, inventory workflows, and financial operations using Laravel REST APIs.
- Built dynamic frontend dashboards and integrated backend services to provide real-time business insights, seamless data flow, and improved system usability.
- Implemented invoice generation, reporting modules, PDF/Excel export functionality, and standardized document management to streamline operational processes.
- Optimized database queries, debugged backend/frontend issues, and improved system performance, scalability, and reliability through clean architecture and maintainable code practices.

Junior Full Stack Developer

Islamabad, PK

Tech Solutions Pro [🔗](#)

Aug 2024 – Mar 2025

- Developed and optimized live projects, addressing real-world challenges and improving solution efficiency through clean and maintainable code.
- Designed, modified, and enhanced backend solutions using Node.js and Laravel, improving system performance, scalability, and reliability.
- Integrated backend technologies to enhance application functionality, streamline processes, and boost overall system efficiency.
- Collaborated with cross-functional teams to implement robust APIs and ensure seamless frontend-backend integration.
- Conducted code reviews, debugging, and optimization to maintain high-quality standards and reduce system

errors.

Frontend Developer

KK Solutions [🔗](#)

Remote

Dec 2023 – May 2024

- Implemented responsive web coding using HTML5, CSS3, and JavaScript, enhancing user experience across devices.
- Integrated RESTful APIs to dynamically fetch and display data, improving front-end interactivity and performance.
- Collaborated with back-end developers to seamlessly integrate API data into the user interface, ensuring smooth data flow and functionality.

Web Developer Internship

eFAIDA Technologies [🔗](#)

Okara, PK

Jul 2023 – Dec 2023

- Designed mobile-first, responsive websites for compatibility with various devices and operating systems.
- Communicated project progress and front-end challenges effectively with stakeholders.

Technical Skills

Languages: PHP, JavaScript, HTML5, CSS3
Technologies: Laravel, Node.js, React.js, Express.js, Wordpress,
Frameworks: Bootstrap, Tailwind CSS, Material UI, Reactstrap
Databases: MySQL, MongoDB
Tools: RESTful API Integration, Git/Version Control

Projects

Multi-Tenant ERP System (Laravel, React)

ecar.carerp.io

- Built a scalable multi-tenant ERP platform with master/tenant database architecture.
- Implemented authentication, RBAC permissions, branch/company management.
- Developed modules for invoicing, reporting, PDF/Excel export, dashboards.
- Integrated REST APIs with React frontend.
- Designed offline sync architecture for uninterrupted operations.
- Optimized database queries and tenant isolation for performance.

Internal FMS System (Laravel, React)

*Internal Enterprise
Project*

- Developed a scalable ERP and financial management system using Laravel and React.js with secure tenant-based architecture.
- Implemented modules for authentication, role-based access control, company and branch management, inventory workflows, and financial operations.
- Built dynamic dashboards, reporting systems, and PDF/Excel export functionality to streamline enterprise-level business processes.
- Integrated RESTful APIs and optimized backend performance for seamless frontend-backend communication and improved system scalability.

Online Pharmacy-4u (Laravel, Bootstrap)

onlinepharmacy-4u.co.uk

- Developed a full-stack online pharmacy and consultation platform using Laravel and Bootstrap.
- Implemented appointment booking, consultation workflows, and secure backend functionality to improve customer interaction.
- Enhanced application performance and optimized user experience through responsive design improvements.

Lana Dessert (Laravel, Bootstrap)

lanadessert.co.uk

- Designed and developed a responsive restaurant web platform using Laravel and Bootstrap.
- Improved UI/UX by implementing modern layouts, optimized navigation, and customer-focused interface enhancements.

Alkway Real Estate (React, Node.js, Express)

alkwayrealestate.com

- Developed a full-stack real estate web application for property listing and management in Dubai market.
- Built responsive frontend using React.js with modern UI components for property search and filtering.
- Implemented backend APIs using Node.js and Express for property data, inquiries, and user management.
- Integrated property detail pages, search functionality, and contact/inquiry system for buyers and agents.

Bello-Food Ordering System (Laravel, Bootstrap)

bellofos.com

- Built and enhanced an online food ordering platform with streamlined ordering workflows.
- Developed backend functionality and responsive frontend components using Laravel and Bootstrap.
- Improved order management efficiency and overall customer experience through feature enhancements.

All State to State Auto Transport (React.js)

allstatetostateautotransport.com

- Developed responsive frontend interfaces for a USA-based vehicle transport booking platform using React.js.
- Integrated dynamic UI components and optimized application performance for better accessibility and usability.

Tour of Switzerland (WordPress)

tourofswitzerland.com

- Customized and optimized a ride-booking platform using WordPress.
- Enhanced booking workflows, responsiveness, and overall site performance for improved user experience.
